

**Government of the People's Republic of Bangladesh  
Institute of Epidemiology, Disease Control and Research (IEDCR)**

**High Risk Group Surveillance of Avian Influenza (Bird Flu)**

**Contact Follow Up Monitoring (Up to May 4, 2009) from IEDCR**

Avian Influenza Contact Follow Up Monitoring Committee regularly monitors the contact persons' follow up from the affected districts. The committee has started its activities from mid January 2008.

Summary of Avian influenza Situation									
	Jan-08	Feb-08	Mar-08	Apr-08	May-08	Jun-08 to Aug-08	Sep-08 to Apr-09	May-09	Grand Total Upto Date
<b>Total No of Affected Districts</b>	17	29	14	5	1	0	24	4	47
<b>Total No of Contact Persons</b>	884	2014	925	102	35	0	698	45	4697
<b>Total No of Persons Followed Up</b>	620	1961	923	102	35	0	698	45	4184
<b>Total No of Persons Completed 14 Days Follow Up</b>	410	1456	783	102	35	0	521	26	3333

**Note:**

- **Contact Types:** Persons involved in culling or Close Contact (less than 1 meter), Household Contact (more than 1 meter), Health Care Worker Contact (unprotected), Other Contacts (not household or not close).  
**Close Contacts** are given Anti-Viral tablets as a single dose for 7 days and followed up for 14 days.  
**Other contacts** are followed up for 14 days without any Anti-Viral tablets.  
**Follow Up** is done daily by a Health Care Worker to detect 'Influenza Like Illness' (Fever, Cough and Respiratory Distress with H/O poultry contact).  
**If there is any suspected case, that is notified individually to IEDCR. Then necessary steps are taken accordingly.**

From January 2008 to 4th May 2009, 47 out of 64 districts in Bangladesh were reported as affected by Bird Flu. 4697 people were reported to be in contact with affected poultries within this period in 47 districts. Among them, 4184 people were followed up for any suspected fever or Influenza Like Illness (ILI). Those who were in direct contact with poultries were given prophylactic anti-viral drug (Tab. Oseltamivir) daily for 7 days. All other contacts including the direct contacts were followed up for 14 days by an authorized health professional. 3333 people completed 14 days follow up till to date. There was no report of any poultry outbreaks in June, July, August and October of 2008.

**Comilla, Manikganj, Norshindi, Tangail, Gaibandha, Chittagong, Rajshai, Dinajpur, Rangpur, Netrokona and patuakhali districts were reported as Bird Flu affected districts up to May, 2009.**
